## BRIGHT WALL UNIT—

Elegant containment solution; LED lights can be fixed on the ceiling. The glass wall units can be positioned individually, with glass side panel or centrally, between other wall units. The doors are made with an aluminum frame and open thanks to soft-closing microhinges, retractable and integrated into the ceiling and into the base of the containers.

In 2018 Bright wall unit is upgraded with the option of lighting on the single glass shelf, thanks to a specific aluminum frame with integrated LED light.

- \_ heights 722/1083/1444 mm
- \_ widths 600/900/1200 mm (+ finishing sides)
- \_ depths 328 mm
