WING SYSTEM—

Wing system is the result of a flexible combination of splashbacks, shelves and lighting profile, and can be placed above the kitchen worktop or freely in other rooms.

The structural element is the splashback which indicates the height of the accessorizable lighting bar, inserted between the second splashback and the first chamfered shelf. The maximum height allowed for the splashback, available in the finishes range, is 650 mm. The shelves are made of extruded aluminum in titan, pewter or matt lacquered finish, and can be accessorized with LED profile. The alternation of the elements has no maximum height limit, and has a maximum width of 3100 mm.

_ widths from 600 to 3100 mm

_ max splashback height/max distance between shelves 650 mm

_ splashback+shelf depth 279 mm
