ASTER — VINCENT VAN DUYSSEN 2023

1—
2

The Aster coffee table, designed by Vincent Van Duysen, is the ultimate expression of compositional rationality and craftsmanship. A unique object made entirely by hand, a contemporary work of art that combines aesthetics and functionality. Each table has a slightly different connotation, testifying to its handcrafted nature. Its base features a brass casting made with an earth mould that gives it the sophisticated hammered effect. The ring is mounted to the legs by welding. A vibratory finishing technique completes the aesthetics. With the help of stones, the structure is gently smoothed, giving it a wavy effect. The top is made of annealed glass and features a slight ripple in the lower area that adds personality. Again, the manufacturing technique is extremely meticulous: the sheet is placed in a mould with a textured bottom and fused at 180° C, giving the glass its distinct finish. . The Aster coffee table is a piece with a sculptural value, which can be used transversally to collections and spaces.
